

Student Learning Outcomes
LU-PRISM

Undergraduate Research Student Learning Outcomes for LU-PRISM

- Demonstrate information literacy in identifying, evaluating, and considering evidence to support their research
- Use critical thinking to articulate a timely and important research question
- Identify and utilize appropriate methodologies to address the research question
- Meet the relevant field's standards for the responsible conduct of research, and effectively navigate challenges that arise in the research process
- Work collaboratively with other researchers, demonstrating effective communication and problem-solving skills
- Communicate the research effectively in oral and written formats
- Reflect constructively on their research experience, identifying what was learned, personal strengths and opportunities for growth, and how the experience informs their future educational and career goals
