Pi Mu Epsilon Problem of the Month
November 2026

2			8		4			6
	3	8		7			5	
					5		0	
0		5						7
	4			6			8	
6						3		2
	0		7					
	1			4		5	7	
5			1		2			0

Problem of the Month Rules:

- The digits 0 through 8 appear in each row, each column, and each 3X3 sub-block exactly once.
- Regions in gold contain the following digits of the golden ratio φ: 1.61803.
- Submissions may only be made by individuals, or groups of two, and must be dated.
- Due date: November 23, 2026, before 5 p.m. to Dr. David Shoenthal or Dr. Phillip Poplin.
